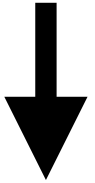
Discrete Time Markov Process

Markov process $(X_t)_{0 \leq t \leq T}$ defined by:

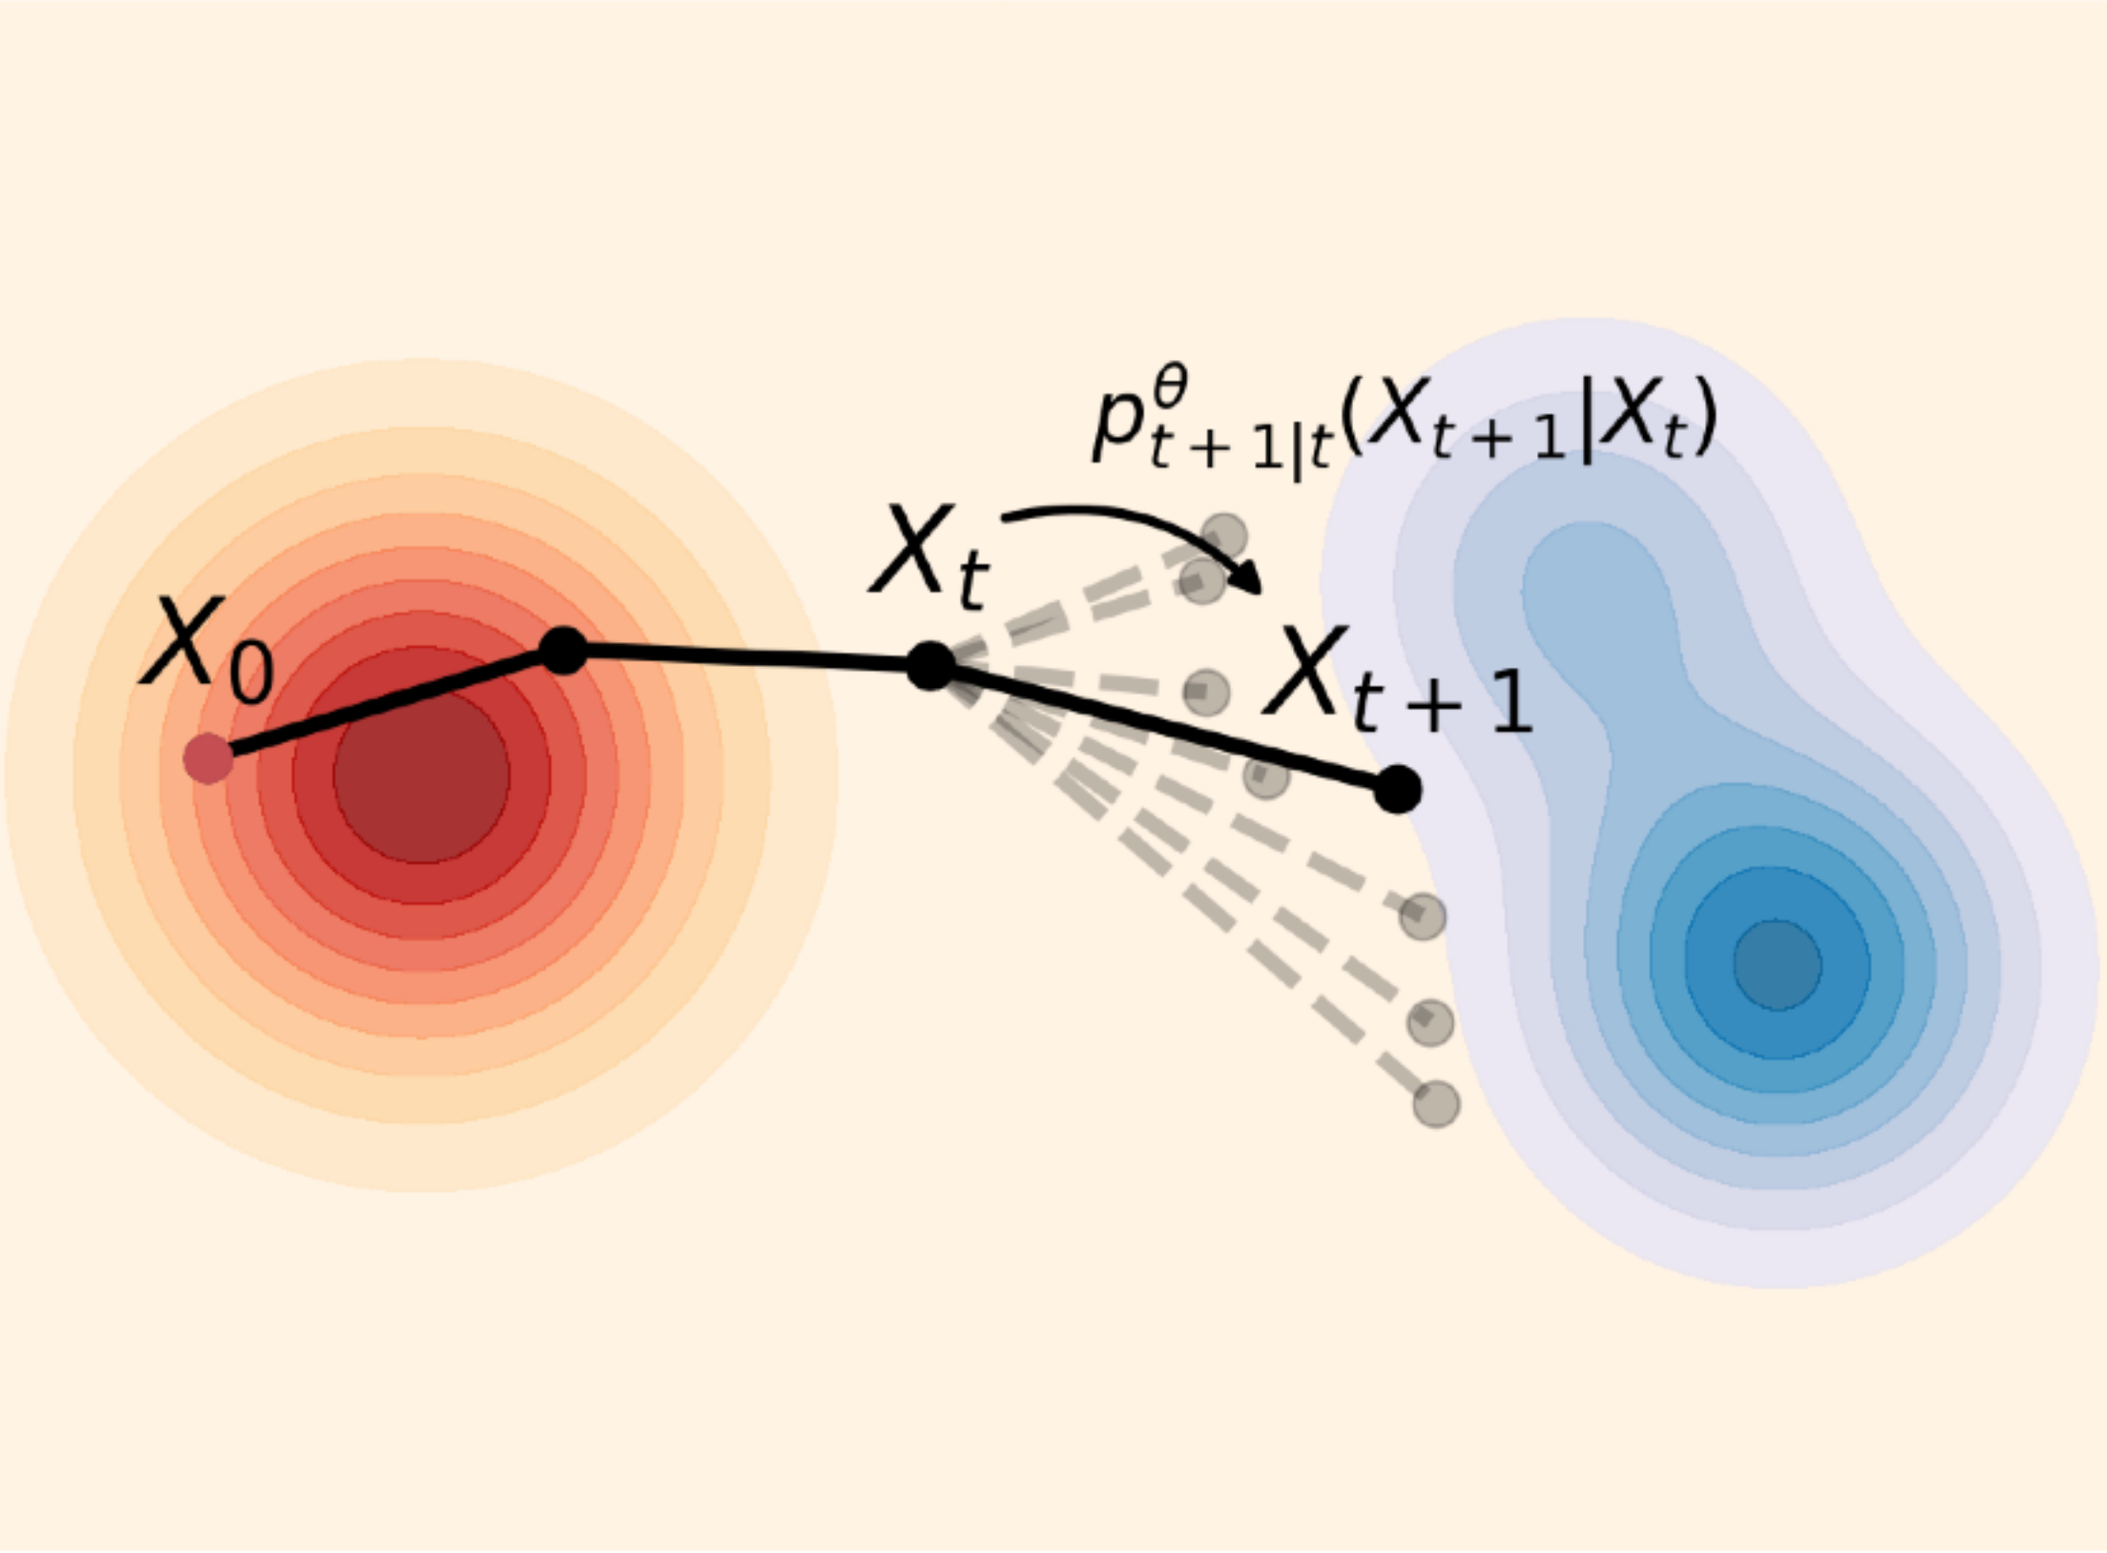
Transition Probability

For t in $\{0,1,...,T-1\}$: $X_{t+1} \sim p^{\theta}_{t+1|t}(\cdot \mid X_t)$

And ***source*** distribution $X_0 \sim p_0$.



$p^{\theta}_{t+1|t}(\cdot \mid X_t)$ is a generative model



$p^{\theta}_{t+1|t}(X_{t+1}|X_t)$
X_t
X_0
X_{t+1}

Discrete Time Markov Process

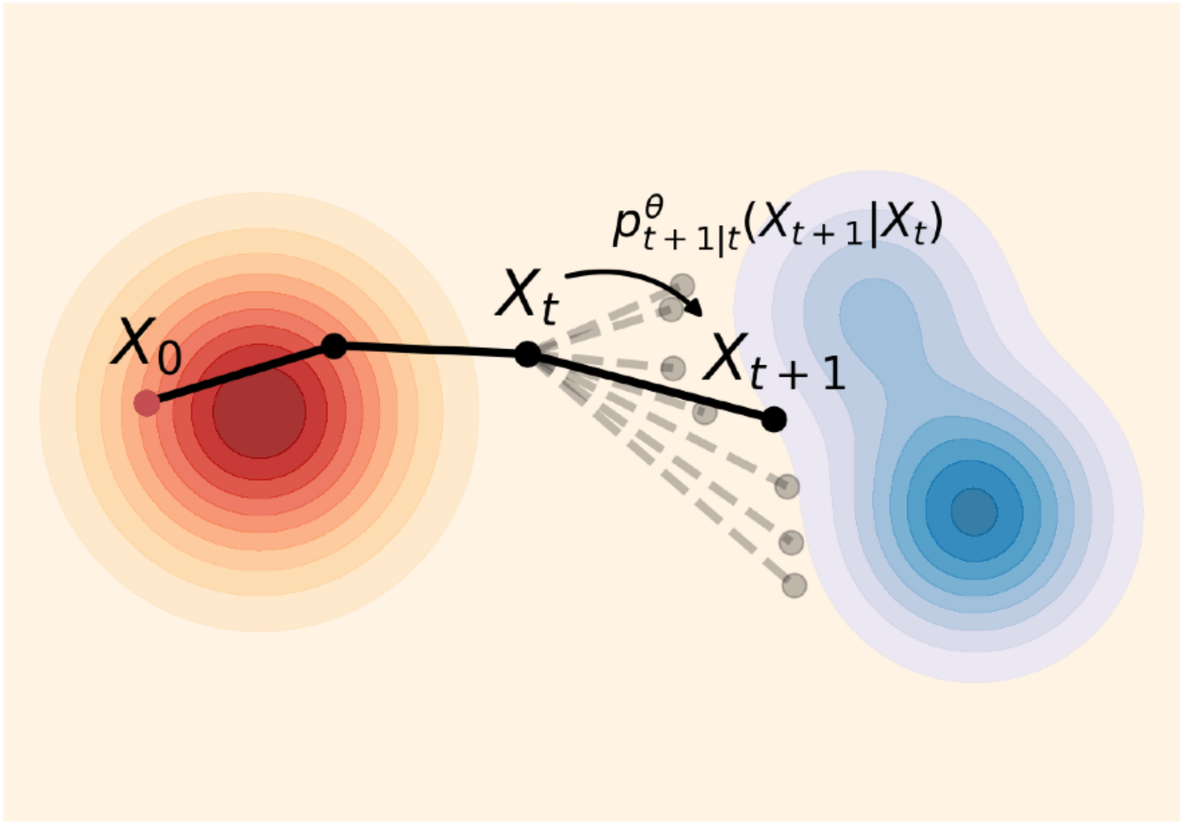
Markov process $(X_t)_{0 \leq t \leq T}$ defined by:

Transition Probability

For t in $\{0,1,...,T-1\}$: $X_{t+1} \sim p^{\theta}_{t+1|t}(\cdot \,|\, X_t)$

And ***source*** distribution $X_0 \sim p_0$.

$p^{\theta}_{t+1|t}(\cdot \,|\, X_t)$ is a generative model



Goal

Explore expressive transition kernels for $p^{\theta}_{t+1|t}(X_{t+1} \mid X_t)$ beyond the Gaussian kernel
